

## Lift, Transmission

NSN: 4910-00-585-3622  
LIN: L59718  
TM: Commercial

### System Description

The Transmission Lift consists of handling brackets, adapters, two safety chains, wire ropes with a Flemish eye in both ends, adjustable tilting action saddle and a lifting platform that can go as low as 10 inches above the floor or lower and as high as 33 inches above the floor or higher.

### System Mission

With a maximum lift capacity 2,000 pounds it should safely lower, transport, lift, sustain and position for removal and installation transmissions, transfer cases, differentials, and other components of the Army's fleet of military and commercial wheeled vehicles.

### Reset Responsibility

Unit

### Reset Location

This system is not currently in reset.

**This system is not currently in reset.**

### Reset Type

**Replace** - Battle losses and washes out from the repair process (procure new).

### Reset Strategy

The Transmission Lift is non-reparable. It is stocked, stored and managed by B14 as a secondary item. To acquire this Lift go through the supply system with a Milstrip requisition.
